

DATACARD® CERTIFIED SUPPLIES

DESKTOP SUPPLIES

FOR DATACARD® SD260 CARD PRINTER

Ensure peak performance

Insist on Datacard Certified Supplies for your Datacard® SD260 card printer. Designed exclusively for the printer, our printheads, ribbons and cleaning supplies can help you achieve the best image quality, most reliable printer performance and lowest possible cost-per-card. Genuine Datacard ribbons also leverage our patented technology to provide automated color and image density adjustment, ribbon usage tracking and ribbon conservation.

Intelligent Supplies Technology™

The SD260 card printer features system-matched Datacard-patented ribbons that activate additional features exclusive to Datacard. Upon installation, the Datacard proprietary ribbons enable all enhanced product features that help you print high-quality cards more easily.

When a genuine Datacard ribbon is loaded into an SD260 card printer, the driver automatically adjusts printer settings to match the ribbon type and helps ensure the best possible image quality on the cards. The printer and supplies then collectively track ribbon consumption and notify you of an upcoming ribbon replacement.

Remarkable image quality

Enhancements in SD260 card printing technology dramatically improve quality and sharpness of photos, graphics and logos by utilizing optimized print ribbons and user-adjustable image and color controls. New TrueMatch™ technology in the SD260 card printer emulates Microsoft-based sRGB color space to seamlessly reproduce on-screen images onto the card. This provides better color matching and reduces the amount of color adjustments needed, creating less hassle for you.

Environmentally conscious supplies

The SD260 printing technology can help eliminate waste with the ribbon saver feature. When printing with genuine Datacard monochrome panel ribbons, the printer advances the ribbon just enough to print the image. Datacard color panel ribbons save one complete panel set during each initialization, while Datacard monochrome ribbons can potentially double and triple the standard yield.

To help you reduce waste and help the environment, Datacard ribbon cores are now biodegradable and engineered with EcoPure® plastic. These new cores offer the same life cycle, performance and reliability as the previous model.

Convenient installation and cleaning

Replacing supplies is quick and easy in the SD260 card printer with a reloadable supplies cartridge with drop-in cleaning roller. The cartridge includes a print ribbon and cleaning sleeve, and it snaps in place without the use of additional tools or adjustments. Simply open the supplies cover, swap out the old ribbon with the new one and resume printing.

Regular cleaning operations will help you keep your SD260 card printer running at peak performance. Datacard Group offers cleaning supplies designed specifically for maintaining your SD260 printer and helps prevent mishandled cards, diminished image quality or damaged printheads.

All ribbons are packaged as a kit and include all the necessary cleaning supplies. This package includes one adhesive cleaning sleeve and one isopropanol cleaning card. When more frequent cleaning is required, additional cleaning supplies can be ordered separately.

Online supplies ordering

The SD260 card printer tracks the number of print jobs consumed on each roll of ribbon and laminate. When the available ribbon remaining is low, the printer will provide a warning message. Within this message, you will be able to automatically link to a website for immediate supplies ordering from your supplier of choice.

DATACARD® CERTIFIED SUPPLIES

Your best choice for supplies

Protect your investment in Datacard® solutions by choosing only genuine Datacard Certified Supplies. We engineer superior performance and reliability into every system-matched supply item we offer, so you can confidently count on Datacard. For you, that means smooth printing, brilliant image quality, high security and exceptional performance. Our worldwide representation provides fast, direct connection with the supplies and support you need, when and where you need them. To ensure you are using Datacard Certified Supplies, purchase only from authorized Datacard distributors.
